February 1978

840 copies

ACKNOWLEDGMENTS

We wish to express our sincere thanks to the members of the organizing committee and the working group leaders. Each of them accepted and competently undertook major responsibilities. We are greatly indebted to all of the participants, who worked hard for long hours in applying their knowledge and skills to the task of the study and in writing their results, which appear in this report. We speak for every participant in thanking many others for their help in preparation before, during and after this Workshop; we wish we could name them all. We thank Joan Depken, Jeannette Thiede and Florence Warren for their skillful assistance in typing these Proceedings. Finally, we are most grateful to the Proceedings Secretary, Lillian Kouchinsky, who met all our requests, both reasonable and unreasonable, with cheerful efficiency.
